PERGAMON

COMPUTERS & GEOSCIENCES

An International Journal devoted to the publication of papers on all aspects of geocomputation and to the distribution of computer programs and test datasets

Editor-in-Chief

G. F. Bonham-Carter, Geological Survey of Canada, 601 Booth Street, Ottawa, Ontario, Canada K1A 0E8
e-mail: bonham-carter@gsc.nrcan.gc.ca *Fax:* 613 996 3726 *Tel:* 613 996 3387

Founding Editor

D. F. Merriam

Associate Editors

F. P. Agterberg, Geological Survey of Canada, 601 Booth Street, Ottawa, Ontario, Canada K1A 0E8, *e-mail:* agterberg@gsc.emr.ca *Fax:* 613 996 3726 *Tel:* 613 996 2374

J. C. Butler, College of Natural Sciences and Mathematics, University of Houston, Houston, TX 77204-5502, USA, *e-mail:* jbutleruh.edu *Fax:* 713 743 8630 *Tel:* 713 743 3411

J. M. Cubitt, ES-Information and Consultancy, Newhaven, Holt, Wrexham LL13 9JP, UK, *e-mail:* john-cubitt@es-information.demon.co.uk *Fax:* (44) 1829 271552 *Tel:* (44) 1892 271643/270883

E. Grunsky (Webmaster), Alberta Geological Survey, 9945 108 St., Edmonton, Alberta, Canada T5K 2G6, *e-mail:* egrunsky@iamg.org *Fax:* (1) 403 422 2454 *Tel:* (1) 403 422 1459

U. C. Herzfeld, Universität Trier, FB VI Geographie/Geowissenschaften, Geomathematik, D-54286 Trier, Germany, *e-mail:* uch@denali.uni-trier.de *Fax:* (49) 651 201 3815 *Tel:* (49) 651 201 4611

R. Kouda, Geological Survey of Japan, 1-1-3 Higashi, Tsukuba, Ibaraki-ken 305, Japan, *e-mail:* roy@gsj.go.jp. Fax/*Tel* (81) 298 54 3637

D. C. Peters, Peters Geosciences, 169 Quaker Street, Golden, CO 80401, USA, *e-mail:* petersdc@petersgeo.com *Fax:* 303 278 6473 *Tel:* 303 278 1540

D. Unwin, Birkbeck College, Department of Geography, 7–15 Gresse Street, London W1P 2LL, UK, *e-mail:* d.unwin@geog.bbk.ac.uk *Fax:* (44) 171 631 6498 *Tel:* (44) 171 631 6485

Book Review Editor

G. Bohling, Kansas Geological Survey, University of Kansas, Lawrence, Kansas 66047, USA, *e-mail:* geoff@kgs.ukans.edu *Fax:* 913 864 5317 *Tel:* 913 864 3965

Software Review Editors

R. Dougill, 18 Dunmore Road, London SW20 8TN, *e-mail:* rfd@fieldata.win-uk.net *Fax:* (44) 181 944 9799 *Tel:* (44) 181 947 5554

S. Henley, Brine Croft, 185 Starkholmes Road, Starkholmes, Matlock, Derbyshire DE4 5JA, UK, *e-mail:* steve@rci.co.uk *Tel:* (44) 01629 581454

J. Tweedie, GeoMEM Consultants, 29 School Road, Kettins, Blairgowrie, Perthshire PH13 9JL, Scotland, *e-mail:* c&g@geomem.co.uk *Fax:* (44) 01828 627785 *Tel:* (44) 01828 628780

Editorial Advisory Board

N. Anderson (USA)
R. Craig (USA)
M. L. Crawford (USA)
J. H. Doveton (USA)
A. G. Fabbri (The Netherlands)
S. E. Franklin (Canada)
G. Gaal (Hungary)
D. Gill (Israel)
J. K. Hall (Israel)
J. Harff (Germany)
S. Henley (UK)
Liu Chengzuo (China)
M. A. Meju (UK)
B. Milkereit (Germany)
N. Nishiwaki (Japan)
R. Pflug (Germany)
R. M. Renner (New Zealand)
M. A. Sophocleous (USA)
W. T. C. Sowerbutts (UK)
J. Tipper (Germany)
V. T. Vuchev (Bulgaria)
H. Wackernagel (France)
D. Watson (Australia)
R. T. Williams (USA)
T. J. Wolery (USA)
Zhao Pengda (China)

Officers and Council of the IAMG (1996–2000)

President: R. A. Olea (USA)
Past President: M. E. Hohn (USA)
Vice President: C. A. Gotway Crawford (USA)
Secretary General: T. A. Jones (USA)
Treasurers: D. M. Tetzlaff (USA), O. Dobrule (UK)

Council Members

H. Chavez (Brazil)
O. Dubrule (UK)
C. Griffiths (Australia)
S. Henley (UK)
U. C. Herzfeld (Germany)
D. G. Krige (S. Africa)
T. Shoji (Japan)
Editor of *Mathematical Geology:* M. E. Hohn (USA)
Editor-in-Chief of *Computers & Geosciences:* G. F. Bonham-Carter (Canada)
Editor of *Nonrenewable Resources:* R. B. McCammon (USA)
Editor of *IAMG Newsletter:* H. Poelchau (Germany)

Publishing Office: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK [*Tel.* (44) 1865 843000; *Fax* (44) 1865 843969].

For queries relating to the general submission of articles (including electronic text and artwork) and the status of accepted manuscripts, please contact the Author Service Department at Elsevier Science Ltd. E-mail: authors@elsevier.co.uk. Fax: +44 (0) 1865 843905. Tel: +44 (0) 1865 843900.

Front cover—Block diagram of structure and associated potential field anomalies, calculated using Noddy—an integrated structural and geophysical modeling scheme developed by Mark Jessell at the Australian Geodynamics Cooperative Research Centre. *e-mail*: mark@artemis.earth.monash.edu.au

List of Contents

NUMBER 1

Graeme Bonham-Carter	iii	Editorial
Ronald J. Bakker	1	Clathrates: computer programs to calculate fluid inclusion *V–X properties using clathrate melting temperatures*
Yuh-Ming Lee and J. Hugh Ellis	19	Estimation and simulation of lognormal random fields
R. O. Thomsen and I. Lerche	33	The influence of timescales in basin modeling calculations
Alexander A. Zlatopolsky	45	Description of orientation textures in remote sensing data using computer program LESSA
Albion D. Taylor	63	Conformal map transformations for meteorological modelers
G. Gottardi and M. Venutelli	77	LANDFLOW: computer program for the numerical simulation of two-dimensional overland flow
G. R. J. Cooper	91	GravMap and PFproc: software for filtering geophysical map data
Pinliang Dong	103	Implementation of mathematical morphological operations for spatial data processing
Chong-Wei Huang and Tian-Yuan Shih	109	On the complexity of point-in-polygon algorithms
R. Marschallinger	119	Automatic mineral classification in the macroscopic scale
Short Note		
Y. Satyanarayana, D. Chanchal, and G. R. K. Murty	127	PROFILE: a Microsoft Quick Basic program for retrieving data along a given profile from gridded data
ANON		
John Castleford and John C. Butler	133	World-Wide-Web: surfing or drowning in a sea of information
Book Reviews		
Gary L. Raines	135	Elements of Spatial Data Quality, edited by Stephen C. Guptill and Joel L. Morrison
Vera Pawlowsky	135	Multivariate Geostatistics, An Introduction With Applications, by Hans Wackernagel

NUMBER 2

C. M. Lemos	139	FDTHERM: a FORTRAN 77 solver for 2-D low-speed flows with buoyancy effects
Eulogio Pardo-Igúzquiza	153	MLREML: a computer program for the inference of spatial covariance parameters by maximum likelihood and restricted maximum likelihood

Eulogio Pardo-Igúzquiza 163 GCINFE: a computer program for inference of polynomial generalized covariance functions

S.-H. Ju and K.-J. S. Kung 175 Mass types, element orders and solution schemes for the Richards equation

David Hart and Albert J. Rudman 189 Least-squares fit of an ellipse to anisotropic polar data: application to azimuthal resistivity surveys in karst regions

Mao Bai 195 An efficient algorithm for evaluating coupled processes in radial fluid flow

Frank Fueten 203 A computer-controlled rotating polarizer stage for the petrographic microscope

Short Notes

M. D. Rudnicki 209 A computer program for plotting oceanographic fence diagrams

P. I. Nenova 215 "Fe23": a computer program for calculating the number of Fe^{+2} and Fe^{+3} ions in minerals

ANON

Bob Abrahart and John C. Butler 221 Internet benefits—an organization's perspective

Book Reviews

James A. Murtha 225 Computing Risk for Oil Prospects: Principles and Programs, by John W. Harbaugh, John C. Davis, and Johannes Wendebourg

Geoff Bohling 226 Spatial Reasoning for Effective GIS, by Joseph K. Berry

Software Review

Graham C. Wilson 229 The MinSource Database on CD-ROM, edited by R. A. Howie and A. M. Clark

I Corrigendum

NUMBER 3

José Fernández, John B. Rundle, Roberto D. R. Granell, and Ting-To Yu 231 Programs to compute deformation due to a magma intrusion in elastic-gravitational layered Earth models

Dhruba J. Dutta 251 ExTra: a FORTRAN program to calculate resistivity departure curves with a quasi-exponential transition zone

Gregory W. Pouch 259 An interactive program for computer-aided map design, display, and query: EMAPKGS2

Dennis L. Johnson and Arthur C. Miller 267 A spatially distributed hydrologic model utilizing raster data structures

Carlo Verrucchi and Angelo Minissale 273 *DATA BASEment: a geochemical database for the study of the Paleozoic successions of the Northern Apennines basement, Central Italy*

Hideaki Miyamoto and Sho Sasaki 283 Simulating lava flows by an improved cellular automata method

Hang-Kwang Luh, Catherine A. Abbott, Michael W. Berry, E. Jane Comiskey, John C. Dempsey, and Louis J. Gross — 293 — Parallelization in a spatially explicit individual-based ecological model—1. Spatial data interpolation

Ali T. Al-Mishwat — 305 — STASSAGE: a FORTRAN program to decode stratigraphic ages from the international IGBADAT database

Short Notes

Jeff Morisette — 317 — Examples using SAS to fit the model of linear coregionalization

V. Radhakrishnan, N. Mariappan, and K. P. Thrivikramji — 325 — A QuickBASIC program to analyze pebble shapes

Philippe A. Thibault and Katherine Klink — 329 — Analog-to-digital conversion of circular chart data

ANON

John C. Butler — 333

NUMBER 4

Guest Editorial

Alan M. MacEachren and Menno-Jan Kraak — 335 — Exploratory cartographic visualization: advancing the agenda

Jason A. Dykes — 345 — Exploring spatial data representation with dynamic graphics

Dianne Cook, Jürgen Symanzik, James J. Majure, and Noel Cressie — 371 — Dynamic graphics in a GIS: more examples using linked software

Charles R. Ehlschlaeger, Ashton M. Shortridge, and Michael F. Goodchild — 387 — Visualizing spatial data uncertainty using animation

Trevor J. Davis and C. Peter Keller — 397 — Modelling and visualizing multiple spatial uncertainties

Beverley J. Evans — 409 — Dynamic display of spatial data-reliability: does it benefit the map user?

William Acevedo and Penny Masuoka — 423 — Time-series animation techniques for visualizing urban growth

Lubos Mitas, William M. Brown, and Helena Mitasova — 437 — Role of dynamic cartography in simulations of landscape processes based on multivariate fields

William Cartwright — 447 — New media and their application to the production of map products

Menno-Jan Kraak and Rico van Driel — 457 — Principles of hypermaps

João Pedro Fernandes, Alexandra Fonseca, Luís Pereira, Adriano Faria, Helder Figueira, Inês Henriques, Rita Garção, and António Câmara — 465 Visualization and interaction tools for aerial photograph mosaics

David Fairbairn and Scott Parsley — 475 The use of VRML for cartographic presentation

Nelson Neves, João P. Silva, Pedro Gonçalves, Joaquim Muchaxo, João M. Silva, and António Câmara — 483 Cognitive spaces and metaphors: a solution for interacting with spatial data

Commentary
Theresa Marie Rhyne — 489 Going virtual with geographic information and scientific visualization

ANON
Klaus Bitzer, Jose Maria Carmona, and John C. Butler — 493 Evolution of Internet resources in Spain

NUMBER 5

Guest Editorial
John C. Butler — 495 Preparing content for distribution via the Internet

Edward S. Chen and Daniel B. Davison — 497 Moving beyond the current state of the Internet

Timothy R. Carr, Rex C. Buchanan, Dana Adkins-Heljeson, Thomas D. Mettille, and Janice Sorensen — 503 The future of scientific communication in the earth sciences: the impact of the Internet

John Pickering — 513 The Internet in universities: liberation or desensitization?

John C. Butler — 521 A virtual geosciences professor

Michelle N. Lamberson, Mark Johnson, Mary Lou Bevier, and J. Kelly Russell — 533 Insights on WWW-based geoscience teaching: climbing the first year learning cliff

Paul Browning and Jane Williams — 549 Using the Internet in teaching and learning: a U.K. perspective

Steven H. Schimmrich — 559 Searching the World Wide Web for geoscience resources

Bernard R. Robin and Sara G. McNeil — 563 Creating a course-based Web site in a university environment

A. P. Boyle, D. N. Bryon, and C. R. C. Paul — 573 Computer-based learning and assessment: a palaeontological case study with outcomes and implications

R. Timothy Patterson — 581 Assignment of World Wide Web virtual museum projects in undergraduate geoscience courses

Jan de Leeuw — 587 The UCLA Electronic Statistics Textbook

Thomas M. Boyd and Phillip R. Romig — 593 — Cross-disciplinary education: the use of interactive case studies to teach geophysical exploration

H. Roice Nelson Jr. — 601 — Virtual seminars

Anon
Pamela Gore and John C. Butler — 607 — Georgia Geoscience On-line: distance education and the Internet in geology classes at DeKalb College

NUMBER 6

Peter M. Allen — 609 — Standardization of mapping practices in the British Geological Survey

K. A. Bain and J. R. A. Giles — 613 — A standard model for storage of geological map data

J. R. A. Giles, D. J. Lowe, and K. A. Bain — 621 — Geological dictionaries—critical elements of every geological database

Jez Higgins and Andy Harris — 627 — VAST: a program to locate and analyse volcanic thermal anomalies automatically from remotely sensed data

Andrzej Anderko and Patrick J. Shuler — 647 — A computational approach to predicting the formation of iron sulfide species using stability diagrams

J. E. McCormack and J. Hogg — 659 — Virtual-memory tiling for spatial data handling in GIS

J. P. Le Roux — 671 — An Excel program for computing the dynamic properties of particles in Newtonian fluids

H. Q. Wang and M. Lacroix — 677 — Interpolation techniques applied to the Eulerian–Lagrangian solution of the convection–dispersion equation in natural coordinates

COGS Contribution
Igor B. Morozov and Scott B. Smithson — 689 — A new system for multicomponent seismic processing

Short Note
Iain M. Brown — 697 — A new method for correlation of multiple stratigraphic sequences

ANON
Pascal de Caprsariis and John C. Butler — 701 — Teaching asynchronously

Software Reviews
James Tweedie — 703 — Editorial

Kevin Telmer and Mathew Leybourne — 705 — Bibliographic databases: **EndNote Plus 2.1.6** for Windows and Macintosh by Niles Associates, Inc., 1996 and **ProCite 3.3** for Windows by Research Information Systems, 1996

NUMBER 7

S. P. Colman-Sadd, J. S. Ash and L. W. Nolan — 715 *GeoLegend: A database system for managing geological map units in a geographic information system*

Jorge Kazuo Yamamoto — 725 **CONVEX_HULL**—a Pascal program for determining the convex hull for planar sets

Geoffrey C. Bohling — 739 GSLIB-style programs for discriminant analysis and regionalized classification

Gerri M. Dunnigan, John L. Hammen and T. Robert Harris — 763 A SAS-IML program for implementing two-phase regression analysis of geophysical time series data

Clodagh NicCanna and Christopher J. Bean — 771 The use of a Parallel Virtual Machine (PVM) for finite-difference wave simulations

Yerahmiel Doytsher and John K. Hall — 785 Gridded affine transformation and rubber-sheeting algorithm with FORTRAN program for calibrating scanned hydrographic survey maps

Eulogio Pardo-Igúzquiza and Peter A. Dowd — 793 AMLE3D: a computer program for the inference of spatial covariance parameters by approximate maximum likelihood estimation

ANON
Dave Crane and John C. Butler — 807 World Wide Web sites and professional Societies: The experience of the Houston Geological Society

I Announcement

NUMBER 8

Terence R. Smith, Bjorn Birnir and George E. Merchant — 811 Towards an elementary theory of drainage basin evolution: I. The theoretical basis

Terence R. Smith, George E. Merchant and Bjorn Birnir — 823 Towards an elementary theory of drainage basin evolution: II. A computational evaluation

E. K. Louvari and A. A. Kiratzi — 851 RAKE: A Windows program to plot earthquake focal mechanisms and the orientation of principal stresses

Marc P. Armstrong and Richard J. Marciano — 859 Massively parallel strategies for local spatial interpolation

Walt W. McNab Jr — 869 Simulation of reactive geochemical transport in groundwater using a semi-analytical screening model

Daniele Castelli, James A. D. Connolly and Giovanni Franceschi — 883 VERTEXVIEW: an interactive program to analyze and plot petrological phase diagrams

José Darrozes, Philippe Gaillot, Michel de Saint-Blanquat and Jean Luc Bouchez — 889 Software for multi-scale image analysis: the normalized optimized anisotropic wavelet coefficient method

F. Yavuz and T. Öztaş 897 BIOTERM—a program for evaluating and plotting microprobe analyses of biotite from barren and mineralized magmatic suites

Short Note
Yi Huang 909 A Pascal program for the Kalman learning algorithm in multilayer neural networks

ANON
P. Browning and J. C. Butler 915 An Information Strategy—who needs one?

NUMBER 9

Zhongbo Yu 917 Application of vector and parallel supercomputers to ground-water flow modeling

Michael Schulz and Karl Stattegger 929 Spectrum: spectral analysis of unevenly spaced paleoclimatic time series

Fuat Yavuz 947 TOURMAL: software package for tourmaline, tourmaline-rich rocks and related ore deposits

Jurgen Garbrecht and Lawrence W. Martz 961 Automated channel ordering and node indexing for raster channel networks

James P. M. Syvitski and Eric W. H. Hutton 967 FLOC: image analysis of marine suspended particles

Kenneth I. Skene, Thierry Mulder and James P. M. Syvitski 975 INFLO1: a model predicting the behaviour of turbidity currents generated at river mouths

D. Garcia-Castellanos, M. Fernàndez and M. Torne 993 Numerical modeling of foreland basin formation: a program relating thrusting, flexure, sediment geometry and lithosphere rheology

Domenico Patanè and Ferruccio Ferrari 1005 SeismPol—a Visual-Basic computer program for interactive and automatic earthquake waveform analysis

Yerahmiel Doytsher and John K. Hall 1013 Interpolation of DTM using bi-directional third-degree parabolic equations, with FORTRAN subroutines

Short Notes
Niels H. Pedersen 1021 PoleMic: a 32-bit Windows program for the identification of minerals in thin section

Raphael Mukaro and Xavier Francis Carelse 1027 A serial communication program for accessing a microcontroller-based data-acquisition system

ANON
D. Ulrich and J. C. Butler 1033 Web content will decide who succeeds online

KEY WORDS INDEX

(Produced from key words supplied by authors)

Affine transformation: 785
Algorithms: 725
Amdahl's Law: 917
Animation: 387, 423, 437
Anisotropy: 189
Approximate maximum likelihood: 793
Archeological investigation: 1093
ArcView: 371
Assessmentware: 549
Asynchronous learning: 521
Authorware Professional: 573
AVHRR: 627
AVS: 1079
Azimuthal data: 189

Basin analysis: 33
Bathymetry: 785
Bending stress: 993
Bilinear: 293
Binary diagram: 947
Bingham fluid: 283
Biotite: 897
Borehole geophysics: 251
Boussinesq approximation: 139
Burial history: 33

C: 63, 689
C++: 1
Cartographic representation: 345
Cartography: 335, 409
Cellular automata: 283
Change point: 763
Chesapeake: 423
Clathrate: 1
Clusters: 771
CM-5: 293
CMAPF: 63
Complexity: 109, 725
Compressional and shear waves: 1051
Computational geometry: 725
Computer aided mapping: 259
Computer animation: 1079
Computer control: 203
Conformal projection: 63
Coniferous forest: 1093
Continuous modeling: 811, 823
Control-volume finite-element model: 77
Convection–dispersion equation: 677
Convex hull: 725
Coordinate transformation: 785
Coordinate transformations: 1063
Coupled process: 195
Courseware: 549
Covariance parameters: 793
Critical shear stress: 671
Cross sections: 851
Cross-spectral analysis: 929
Crystallization temperature: 897

Darcy's Law: 917
Data processing: 1063
Database management systems: 273
Database: 305, 581, 715
Databases: 621
DEM: 267
Depth soundings: 785
Descriptive and inferential statistics: 273
Desktop mapping: 259
Dictionary: 621
Differential operator: 195
Digital Elevation Model (DEM): 1013
Digital elevation model: 387, 961
Digital orthophoto mosaics: 465
Digital spatial libraries: 465
Digital terrain map: 45
Digital Terrain Model (DTM): 1013
Digitizing: 785
Dip and strike: 1013
Discriminant analysis: 739
Discriminant function analysis: 119
Displacement: 231
Distance learning: 601
Distributed modeling: 961
Domain: 621
Drainage network: 961
Drift: 153
Dynamic cartography: 409
Dynamic maps: 335, 345
Dynamic sketching: 465

Ecology: 293
Education: 563, 581, 587, 593
Elastic-gravitational layered Earth: 231
Elastic: 993
Electron microprobe analysis: 947
Electronic mapping: 259
EMAPKGS2: 259
Erosion: 437, 993
Education: 513
Eulerian–Lagrangian solution: 677
Evolution: 811, 823
Examination: 573
Exploratory data analysis: 335, 371

Filtering: 91
Finite difference method: 917
Finite difference: 993
Flocs, PhotoCD: 967
Floods: 975
Fluid flow: 195
Fluid inclusions: 1
Fluvial landscapes: 811, 823
Fly-over navigation: 465
Focal mechanisms: 851
FORTRAN 77: 77
Fortran-77: 793
FORTRAN: 63, 139, 689, 739, 1013
Fossil: 573
Fractured porous media: 195
Frequency domain: 91
Fumarole field: 627

Functionality: 457
Fuzzy: 397

Galerkin finite-element model: 77
Gauss quadrature: 251
Geochemical modeling: 869
Geochemical: 305
Geochemistry: 273
